

Bunurong Coast Education Home Education Program Term 2, 2019

Date/time	Age group	Activity	Presenter	Meeting PT
Thurs 9/5/19 10-12	10-14	Plant/Animal Identification Students will learn 5 plants and 5 animals in this session and develop their own Pressed Plants collection, and their own Animal Identification Field Guide.	Mike Cleeland	BEC
Thurs 9/5/19 1-3	7-10 Older ages can be catered for	Enviro Art In this class students will be developing artistic skills in an environmental context concentrating on interpretation of Australian Animals. Samples are provided or you can bring your own example along to work on. Materials are supplied, but feel free to bring any of your own as well.	Pip Cleeland	BEC
Thurs 6/6/19 10-12	10-14	Coastal Geography Students learn about coastal landforms and landscapes, and the processes that have formed them. On this very dynamic coastline, they can observe human interactions with the natural environment and how these are managed. The impacts of climate change on both the natural and manmade environments can be seen and assessed, and predictions about future impacts made.	Aileen Vening	BEC
Thurs 6/6/19 1-3	10-14	Plant/Animal Identification Students will learn 5 plants and 5 animals in this session and develop their own Pressed Plants collection, and their own Animal Identification Field Guide.	Mike Cleeland	BEC
Tues 25/6//19 10-12	10-14	Dinosaur Discovery An update on recent dinosaur discoveries in Victoria and Australia, together with a field trip to Flat Rocks.	Mike Cleeland	BEC
Tues 25/6/19 1-3	10-14	Environmental movie project Using your own iPhone or iPad make a small video incorporating as much of the learning gained over the term. The goal of the video will be to educate and inform the wider public about any aspect of climate change that has captured your imagination during the term's sessions.	Mike Cleeland	BEC
